Party for Possibilities!

May 9 | 5:30–7:30PM | Jupiter Hotel NEXT

The Event

An evening to celebrate and support Community Vision's Assistive Technology Lab.

Impact

Our Assistive Technology (AT) Lab ensures that people with disabilities can participate in life. As with all our programs, we think about the person first and what they want to achieve. We then work with people and their support team to find AT solutions. We educate teachers, healthcare providers, and others on how to do this work and create resources to facilitate the broader use of AT across the region. AT can mean the difference between silence or a voice, between isolation and community.

Marketing

Will take place from February to May and includes:

- 5 Emails – Shared to our list of supporters
- 1 Video – Shared via email, social media, and YouTube
- Social media promotion and event website
- Event signage and materials

Fundraising Goal: \$55,000
